## OUTPATIENT SURGICAL SPECIALTIES CENTER<sup>LLC</sup>

### **Bundled Surgical Package Disclaimer**

***NOTE: If OSSC is filing your insurance, the Bundled Surgical Package does NOT apply.***

Our goal is for the price to be as transparent as possible. The price for the procedure includes the facility fee, the surgeon's fee and the anesthesiologist's fee. The initial consultation with the surgeon is also included, as is uncomplicated/routine follow-up care. With the duration of postoperative care being different for each surgical procedure, your surgeon will inform you at the initial consultation what is included.

The \$200 initial consultation fee is applied to the total cost of the procedure, should surgery be indicated. If surgery is not indicated the \$200 will be retained by the surgeon's office as a consultation fee.

A list of what is NOT included in the fee is as follows, but not limited to:

- Any diagnostic studies necessary prior to the surgery such as lab, MRI, X-rays, consultations with specialists to determine medical risk/management, physical therapy and rehabilitation.
- Any implants and/or hardware necessary for completion of the procedure. (For example, plates, screws, anchors, grafts, or bracing for orthopedic procedures or sinus implants and balloons for ENT procedures.) A price estimate of additional items will be provided prior to surgery, but subsequent to the surgical consultation. Our experienced surgical staff will have a better idea of what is needed for the specific case once the initial consult has taken place. Implants and hardware supplies provided to you from OSSC will be at invoice cost without any markup whatsoever. We will not receive any profit from providing those items.
- Follow-up x-rays, DME/bracing, or other items outside of a routine postoperative visit.
- Lodging and/or travel expenses.
- Expenses and/or fees resulting from complications subsequent to the completion of the surgery and discharge from the facility are also not included.
